Ariete fork oil-seals are the best you can get. This claim is justified by the quality of the materials used, and attention to detail in their design and manufacture. The **ARI** range has more than 160 different seal sizes. These cover more than 35,000 different motorcycle models with both traditional and upside-down forks. We have seals for classic 1960s telescopic forks extending through to the air forks now common both on- and off-road.

ARI fork oil-seals - perfection, from Ariete.

L'anello di tenuta paraolio di **Ariete** è il top esistente nel mercato per l'alta qualità dei materiali utilizzati e l'elevatissimo grado di finitura. La linea **ARI** con oltre 160 tipi diversi equipaggia più di 35.000 modelli di moto con forcelle tradizionali e rovesciate (USD) dal funzionamento teleidraulico degli anni 60 a quello pneumatico (Aria) sempre più attuale nel mondo Off-Road. **ARI**, il paraolio di Ariete sinonimo di perfezione assoluta.

El retén de horquilla **Ariete** representa el máximo nivel alcanzado en el mercado existente gracias a la alta calidad de los materiales utilizados y también al alto grado de acabado. La línea **ARI**, con más de 160 tipos diferentes equipa a más de 35.000 modelos de motocicletas con horquillas convencionales y telescópicas invertidas (USD), desde aquellas de funcionamiento hidráulico de los años '60 hasta las de funcionamiento neumático (Aire) cada vez más presentes en el mundo Off-Road.

ARI, el retén de Ariete sinónimo de perfección absoluta.

**WE PRODUCE WITH EXPERIENCE**

The guiding principle of the company was always to produce goods of high quality. That is our golden rule. Ariete achieves this by constant research into raw materials, and the technology involved in transforming these into finished product. Where the environment is concerned, our procurement and production processes are as laid out in the "Sandro Mentasti Environmental Protection Program". Our corporate values are shared by our experienced and faithful collaborators who with passion and dedication continue to express the experience gained by the Company in 68 years of activity. Thanks to this structure, we can provide our markets at home and abroad with outstanding products we have designed, manufactured, tested and fully certified. Products which satisfy the requirements of experienced motorcyclists on city streets, on the race track or on remote adventure voyages. Ariete products - evolved, developed and made in Italy.

**PRODUCIAMO CON ESPERIENZA**

Da sempre il principio ispiratore dell'Azienda è l'altissima qualità di ciò che produce: vero Leitmotiv che ci accompagna fin dalle nostre origini. Altissima qualità che Ariete raggiunge con la Ricerca a livello mondiale orientata a pregiatissime materie prime poi elaborate con sofisticate tecnologie di produzione nel pieno rispetto dell'ambiente secondo il disciplinare "Sandro Mentasti Environmental Protection Program". Il valore dei nostri preziosi ed esperti Collaboratori che con passione e dedizione esprimono l'esperienza acquisita e maturata dall'Azienda nei 68 anni di attività ci permette di proporre ai mercati di tutto il mondo prodotti di alta gamma concepiti, realizzati, testati ed infine Certificati in grado di soddisfare pienamente il Motociclista più esigente sia che si trovi in un percorso urbano, in pista, o nel più impervio sterrato off-road. Ariete: evoluzione dell'esperienza made in Italy.

**PRODUCIMOS CON EXPERIENCIA**

Desde siempre ha sido el principio rector de la empresa la calidad de lo que produce: verdadero leitmotiv que nos acompaña desde nuestros orígenes. La altísima calidad que obtiene Ariete llega de la búsqueda a nivel mundial de materias primas preciadas y luego procesadas utilizando tecnologías de producción sofisticadas protegiendo al mismo el medio ambiente según la especificación disciplinaria "Sandro Mentasti Environmental Protection Program". El valor de nuestros experimentados colaboradores que con pasión y dedicación expresan su práctica adquirida y madurada por la empresa en los 68 años de actividad nos permite ofrecer a los mercados de todo el mundo productos de gama alta diseñados, fabricados, probados y certificados capaces de satisfacer al motociclista más exigente, ya sea en una ruta, pista o en el más arduo trayecto de tierra urbana. Ariete: evolución del made in Italy.

ARIETE FORK OIL SEALS, custom-made for your fork

Ariete fork oil seals are different! The quality of their execution is matched by the unique nature of the material used: the **carboxylated elastomer known as XNBR**. This compound offers unique characteristics of resistance to abrasion, to high temperatures, and to the complex lubricants with numerous additives, which are used in modern forks as fitted to motorcycles and scooters.

The reciprocating action of the fork tube against the seal subjects it to a notable degree of abrasion, which is complicated by the heat generated as a result of hydraulic displacement within the fork, plus the friction of the components involved. This mechanical wear and tear leads to accelerated ageing of the rubber which is also obliged to deal with the chemical action of the various additives in the lubricant.

Oil seals are normally made from a nitrile rubber, known as NBR. This is used because it is cheap, and plentiful, not because NBR is the best material for the job.

Our technical staff have accumulated 60 years of experience in the rubber industry, and have spent many years looking for a better material for the manufacture of oil seals. In our view, the carboxylated elastomer known as XNBR has the following major advantages when compared with NBR:

Although the cost of XNBR is almost twice that of NBR, the sophisticated technology used to make our oil seals enables us to put them on the market at highly competitive prices. In this way, the Ariete Customer enjoys the benefits of a very high quality product, which satisfies the most demanding requirements, at a competitive price.

ARIETE FORK OIL SEALS, gli specifici anelli di tenuta per forcelle

L'anello di tenuta paraolio per forcella prodotto dalla Ariete si differenzia da tutti gli altri disponibili sul mercato per l'alta qualità ed unicità del materiale utilizzato per la sua realizzazione: l'**elastomero carbosilico XNBR**.

Questa miscela infatti possiede caratteristiche eccezionali di resistenza alla abrasione, alla temperatura ed agli olii con particolari additivi usati nelle moderne forcelle per moto e scooters.

L'anello di tenuta per forcella lavorando in senso longitudinale sullo stelo è sottoposto ad una notevole azione abrasiva che unita al calore generato dallo scorrimento provoca un processo di deterioramento della parte in gomma che già è messa a dura prova dall'aggressione chimica degli olii con relativi additivi.

La normale gomma nitrilica NBR, solitamente impiegata da tutti i produttori di anelli paraolio, è una scelta mediocre determinata da fattori di economicità.

Lo Staff Tecnico della Ariete, dopo approfonditi studi e sperimentazioni e supportato dall'esperienza maturata dall'Azienda in sessanta anni di attività, ha adottato per questa linea di anelli paraolio l'**elastomero carbosilico XNBR** che rispetto al tipo normale NBR presenta le seguenti performances:

Le sofisticate tecnologie di produzione impiegate dall'Ariete permettono di ottenere prezzi altamente competitivi nonostante il costo dell'elastomero XNBR sia quasi il doppio del tipo normale permettendo al Cliente Ariete di avere un prodotto di altissima qualità che soddisfi le più esigenti aspettative ad un prezzo equo.

ARIETE FORK OIL SEALS, el retén específico para horquilla

El retén de horquilla producido por Ariete se diferencia de otros productos existentes por la alta calidad y unicidad del material utilizado para su fabricación: el **elastómero carbosilicio XNBR**.

Esta mezcla posee en efecto características excepcionales de resistencia a la abrasión, a la temperatura y a los aceites que con aditivos muy específicos se utilizan en las horquillas de motocicleta y scooter.

El retén para horquilla, al trabajar en sentido longitudinal a la barra está expuesto a una notable acción abrasiva que unida al calor provocado por la fricción generan un proceso de deterioro de la goma. Es importante entender que esta ya ha sido puesta a una dura prueba debido a la agresión de los aditivos que tiene los aceite para horquilla.

Los compuestos de gomas nitrílicas NBR, normalmente empleadas en la producción de todos los retenes de horquilla es una mediocre elección determinada por factores exclusivamente económicos.

Sesenta años de experiencia, sobre todo en el exigente mundo industrial, han determinado que el equipo dirigente de Ariete determinara que la producción de estos productos ha de tener de forma exclusiva el elastómero de carbonosilicio XNBR que respecto a los tipos normales NBR tiene las siguientes ventajas:

Las sofisticadas técnicas de producción empleadas en Ariete permiten obtener unos precios altamente competitivos a pesar de que el costo del compuesto XNBR es prácticamente el doble del tipo normal. Para nosotros es importante explicar que el Cliente Ariete obtiene unos productos de altísima calidad que satisfarán las mas exigentes expectativas.

TECHNICAL INFORMATION

ARIETE FORK OIL SEALS, les Joints Spy de fourche

Le Joint Spy de fourche produit par Ariete se différencie de tous les autres disponibles sur le marché par la haute qualité et le matériel unique utilisé pour sa réalisation: l'élastomère carboxylique XNBR.

Ce mélange comporte des caractéristiques exceptionnelles de résistance à l'abrasion, à la température et aux huiles contenant des additifs particuliers utilisés dans les fourches modernes pour motos et scooters.

Les joints spy de fourche en travaillant de façon longitudinale le tube sont soumis à une importante action abrasive qui, avec la chaleur, produite par le frottement provoque un processus de détérioration de la partie en caoutchouc qui est déjà mis à dure épreuve par l'agression chimique des huiles et ses additifs.

Le caoutchouc nitrile NBR, habituellement employé par tous les fabricants de joints spy, est un choix médiocre déterminé par des facteurs économiques.

Le Staff Technique de Ariete après des études approfondies et des expérimentations effectués grâce à l'expérience de la Société après soixante-dix ans d'activité, a adopté pour cette ligne de produits l'élastomère carboxylique XNBR qui par rapport au type normal NBR présente les performances suivantes:

Les technologies de production particulièrement sophistiquées employées par Ariete permettent d'obtenir des prix hautement compétitifs malgré que le coût de l'élastomère XNBR soit presque le double du type normal permettant au Client Ariete d'avoir un produit de très haute qualité qui satisfait les demandes les plus exigeantes à un prix abordable.

ARIETE FORK OIL SEALS, die Spezialgabdichtungen

Gabdichtungen von Ariete heben sich von allen anderen marktüblichen Gabdichtungen durch die außergewöhnliche Qualität und die Einzigartigkeit des Werkstoffes ab, aus dem sie hergestellt werden: das Karboxylelastomer XNBR.

Dieses Gemisch weist hervorragende Abriebs- und Temperaturbeständigkeit sowie Beständigkeit gegenüber den Ölen und Zusätzen auf, die bei modernen Gabeln für Motorräder und Skooter zum Einsatz kommen.

Gabdichtungen werden in Längsrichtung am Schaft beansprucht und sind erheblicher Reibung und Reibungshitze ausgesetzt, welche das Gummiteil, das bereits durch die chemischen Angriffe durch Öl und die entsprechenden Zusätze auf eine harte Probe gestellt wird, zusätzlich beanspruchen.

Der normale Nitrilgummi NBR, der in der Regel von allen Gabdichtungsherstellern eingesetzt wird, stellt eine mittelmäßige, wirtschaftlich bedingte Wahl dar.

Die technischen Mitarbeiter von Ariete haben nach grundlegenden Untersuchungen, Experimenten und mit der Erfahrung, die Firma im Laufe ihrer sechzigjährigen Tätigkeit gesammelt hat, für diese Gabdichtungen das Karboxylelastomer XNBR eingeführt, das gegenüber dem herkömmlichen NBR folgende Vorzüge bietet:

Aufgrund unserer hochentwickelten Produktionstechnologie, können wir den von Ariete Kunden ein Produkt für höchste Anforderungen zu einem wettbewerbsfähigen Preis anbieten, obwohl der verwendete Rohstoff im Gegensatz zu anderen Rohstoffen fast das Doppelte kostet.

САЛЬНИКОВЫЕ УПЛОТНЕНИЯ ВИЛКИ ФИРМЫ АРИЕТЕ

Сальниковые уплотнения вилки, произведенные фирмой Ariete, отличаются от остальных подобных изделий своим высоким качеством и уникальностью материала, используемого при производстве: карбоксилированный эластомер, известный как XNBR. Это соединение обладает отличными свойствами устойчивости к износу, высоким температурам, а также маслам с особыми добавками, которые используются в современных вилках для мотоциклов и скутеров.

Сальниковые уплотнения вилки, работая на валу в продольном направлении, подвергаются значительному изнашивающему эффекту, который вместе с высокой температурой, возникающей при таком перемещении, приводит к ухудшению части из каучука, и без того страдающей от химического воздействия масел с соответствующими добавками. Обычный нитрильный каучук NBR, чаще всего используемый производителями сальниковых уплотнений, является не самым лучшим выбором, и используется из-за своей дешевизны. Технический отдел фирмы Ariete, на основании 60-летнего опыта компании и после тщательных исследований и экспериментов, применил для этой линии сальниковых уплотнений карбоксилированный эластомер XNBR, который по сравнению с нормальным NBR, имеет следующие показатели:

Современные технологии, применяемые Ariete, обеспечивают конкурентоспособные цены несмотря на то, что стоимость эластомера XNBR почти в два раза выше изделия из обычного материала, что позволяет клиенту Ariete получить изделие высочайшего качества, удовлетворяющее самые строгие требования за справедливую цену.

ARISIL special oil seal lubricant

ARI fork oil seals are made from a rubber compound specifically developed to work with the lubricants used in front forks, with all their various additives. This compound is completely different from that normally used for rotating shaft seals, since the physical environment inside a fork with its reciprocating movement, and the specialist lubricants, are completely different. We have designed **ARI** oil seals with a variety of lip profiles to make them longer lasting, while reducing to a minimum the friction effect against the moving shaft. Over the years, we have discovered the key role of a separating lubricant between the fork tube and the rubber of the oil seal to reduce to a minimum the surface friction, without affecting the function of the oil seal. After exhaustive testing, we have chosen a lubricant which is produced in the USA, and devised specifically as a rubber/metal lubricant for mechanical components used in the NASA space program. The advantage of this special grease, which we call **ARISIL**, is that it extends the life of the oil seal, and helps it retain its vital characteristics of flexibility and chemical resistance. For this reason, every set of **ARI FORK OIL SEALS** contains a single dose sachet of **ARISIL**, sufficient to lubricate the two oil seals supplied.

ARISIL lo speciale grasso lubrificante per anelli di tenuta

L'anello di tenuta paraolio per forcella **ARI** è prodotto con una miscela di gomma specifica per resistere agli olii, con relativi additivi, utilizzati nelle sospensioni. Questa miscela è completamente diversa da quella usata normalmente per gli anelli paraolio per alberi rotanti, in quanto deve resistere in modo diverso all'aggressione chimica causata dagli olii ed al lavoro meccanico in senso longitudinale tipico della forcella. I nostri anelli di tenuta paraolio **ARI** sono inoltre concepiti con una struttura di labbri di tenuta particolari con diverse sezioni per meglio resistere e al tempo stesso ridurre il più possibile l'attrito dello stelo all'interno del paraolio. Nel corso degli anni si è evidenziato il ruolo indispensabile di un lubrificante separatore tra lo stelo e l'anello in gomma che riduca il più possibile l'attrito senza compromettere la tenuta della guarnizione. Per risolvere questo problema abbiamo testato diversi grassi e la scelta è caduta su uno speciale grasso silconico, prodotto negli USA studiato appositamente per le applicazioni gomma-metallo degli organi meccanici dei veicoli spaziali della NASA. Il vantaggio di questo grasso particolare che abbiamo denominato **ARISIL** sta nel fatto di prolungare la vita del paraolio preservando l'integrità delle caratteristiche fondamentali di resistenza chimica ed elastica. Per questo motivo in tutte le nostre confezioni di **ARI FORK OIL SEALS** includiamo una bustina monodose di **ARISIL** che serve per il corretto montaggio dei 2 paraolio.

ARISIL la grasa especial para retenes

Los retenes de horquilla **ARI** se han fabricado con un tipo de goma resistente a los aditivos que llevan los aceites de suspensión. Esta mezcla es completamente diferente de la que pueda utilizarse para los retenes de cigueñal, ya que debe resistir de una forma diferente la agresión química causada por el aceite, así como el trabajo mecánico en el sentido longitudinal propio de la suspensión. Nuestros retenes **ARI** se han proyectado, además, con estructuras en el borde del labio diferentes para mejorar la resistencia y al mismo tiempo reducir el máximo posible la fricción de la barra en el interior del reten. La experiencia ha demostrado que es necesario un lubricante separador entre la barra y el reten, su misión es reducir la fricción sin deteriorar la estanqueidad de la junta. Para resolver este problema probamos diversos componentes grasos, el escogido fue una grasa silicona, producida en los U.S.A. y especialmente estudiada como aplicación para goma - metal de los órganos mecánicos de los vehículos espaciales de la N.A.S.A. Las ventajas de esta grasa, que hemos denominado **ARISIL**, reside en el factor que permite alargar la vida del retén preservando la integridad de las características fundamentales de resistencia química y elástica. Por este motivo hemos incluido en todos nuestros kits de reparación **ARI FORK OIL SEALS**, una bolsa de **ARISIL** que sirve para montar de forma correcta los dos retenes.

TYPICAL CHARACTERISTICS

Product type:	GREASE
Colour:	WHITE
Composition:	SILICONE LUBRICANT WITH ADDITIVES
Temperature range	-65° degrees c => +175° degrees c
Coefficient of friction	0.003 - load 6.3 n at 10 mm per second 24h
USA military specification	G-4343 C

 **ARISIL la graisse speciale lubrifiante pour joints spy**

Le joint spy de fourche **ARI** est produit avec un mélange de caoutchouc spécifique pour résister aux huiles, et ses additifs utilisés dans les fourches. Ce mélange est totalement différent de celui qui est normalement utilisé pour les joints spy de vilebrequin. En effet il doit résister à l'agression chimique causée par les huiles et au travail mécanique dans le sens longitudinale typique du fonctionnement d'une fourche. Nos joints spy de fourche **ARI** sont conçus avec une géométrie de lèvres particulièrement étudiée avec différentes sections pour mieux résister à l'abrasion et en même temps réduire au maximum le frottement du tube de fourche à l'intérieur du joint spy. Au cours des années nous avons mis en évidence le rôle indispensable de la forme des lèvres ainsi que leur usinage afin de réduire au maximum le frottement sans pour cela compromettre l'étanchéité di joint. Pour résoudre ce problème, nous avons testé plusieurs graisses et notre choix s'est arrêté sur une graisse spéciale siliconique, produite aux USA et étudiée pour les applications caotchouc-métal des organes mécaniques des véhicules spatiaux de la NASA. L'avantage de cette graisse particulière que nous avons nommée **ARISIL**, consiste à prolonger la durée de vie du joint spy tout en préservant l'intégrité des caractéristiques fondamentales de résistance chimique et élastique. C'est pour cette raison que dans toutes nos boites de **ARI FORK OIL SEALS** nous joignons une pochette monodose de **ARISIL** qui sert pour le montage correct des 2 joints spy.

 **ARISIL Spezialfett für Dichtungsringe**

Die Gabeldichtung **ARI** wird aus einem spezifischen Gummigemisch hergestellt, welches beständig gegenüber Öls und den entsprechenden Zusätzen in Federungen ist. Dieses Gemisch ist vollkommen anders als das Material, das in der Regel für Wellendichtungen verwendet wird, da es der chemischen Aggression des Öls und zudem der mechanischen Beanspruchung in Längsrichtung durch die Gabel standhalten muss. Unsere Gabeldichtungen **ARI** haben zudem eine besondere Struktur mit unterschiedlich dicken Dichtungslippen, um die Haltbarkeit zu verbessern und gleichzeitig die Reibung des Schafts im Dichtungsring so weit wie möglich zu reduzieren. Im Laufe der Jahre hat sich die Wichtigkeit eines Trennmittels zwischen Schaft und Gummiring herausgestellt, mit der die Reibung so weit wie möglich reduziert werden soll, ohne die Dichtigkeit zu beeinträchtigen. Um dieses Problem zu lösen, haben wir verschiedene Fette getestet und unsere Wahl fiel schließlich auf ein spezielles Silikonfett, das in den USA hergestellt wird und speziell für Anwendungen bei Kontakt zwischen Gummi und Metall in den beweglichen Organen der NASA-Raumfahrzeuge entwickelt wurde. Der Vorzug dieses Spezialfetts, dem wir den Namen **ARISIL** gegeben haben liegt darin, dass die Lebensdauer der Dichtung verlängert, jedoch die wesentlichen Merkmale im Bezug auf chemische Beständigkeit und Elastizität beibehalten werden. Aus diesem Grund liegt allen unseren Packungen **ARI FORK OIL SEALS** eine Einmaldosis **ARISIL** bei, die für den korrekten Einbau der 2 Gabeldichtungen reicht.

 **ARISIL, специальная смазка для сальниковых уплотнений**

Сальниковые уплотнения для вилок **ARI** производятся с использованием каучука, обеспечивающего устойчивость к маслам с добавками, используемыми в суспензиях. Такое соединение полностью отличается от тех, которые обычно используются для сальниковых уплотнений вращающихся валов, так как оно реагирует иным образом на химическое воздействие масел и механическую работу вилки в продольном направлении. Кроме того, наши сальники **ARI** имеют конструкцию из особых уплотнений с многочисленными секциями для оптимального сопротивления и максимального сокращения трения вала внутри сальника. С течением лет была выявлена незаменимая роль смазки-разделителя между валом и каучуковым кольцом, которая бы максимально сокращала трение и не нарушала герметичность уплотнения. Для решения этой проблемы мы испытали многие смазки и выбрали силиконовую смазку, производимую в США и разработанную специально для применения каучук-металл в механических изделиях космических судов NASA. Преимущество этой особой смазки, которую мы назвали **ARISIL**, состоит в том, что она продлевает жизнь сальника и сохраняет важнейшие свойства химического и эластического сопротивления. По этой причине во все упаковки сальниковых уплотнений вилок **ARI** мы вкладываем одноразовую упаковку **ARISIL**, которая позволяет правильно установить 2 сальника.

The Split fork seal driver is a tool used for changing the fork seals on conventional and upside down forks. Available for fork seals in 35 mm thru 51 mm configurations. Manufactured from plated carbon steel, featuring split design and weighted body. Weight range from 800 to 1.000 gr. Sold individually.

Questo attrezzo per montare correttamente i paraolio su forcelle tradizionali e rovesciate (upside down) è disponibile per paraolio da 35 a 51 mm di diametro interno. Ricavato dal pieno è in acciaio con trattamento galvanico anticorrosione ed ha una superficie esterna lavorata per una presa sicura. Il peso è tra gli 800 ed i 1000 grammi a seconda delle misure. Viene venduto singolarmente.

Este útil para el montaje correcto de los retenes en horquillas tradicionales e invertidas (upside down) está disponible para retenes de 35 a 51 mm de diámetro interno. Realizado a partir de un bloque de acero mecanizado, con un tratamiento anticorrosión, posee una superficie externa que permite un perfecto agarre. El peso está comprendido entre 800 y 1000 grs. Se vende por unidades.

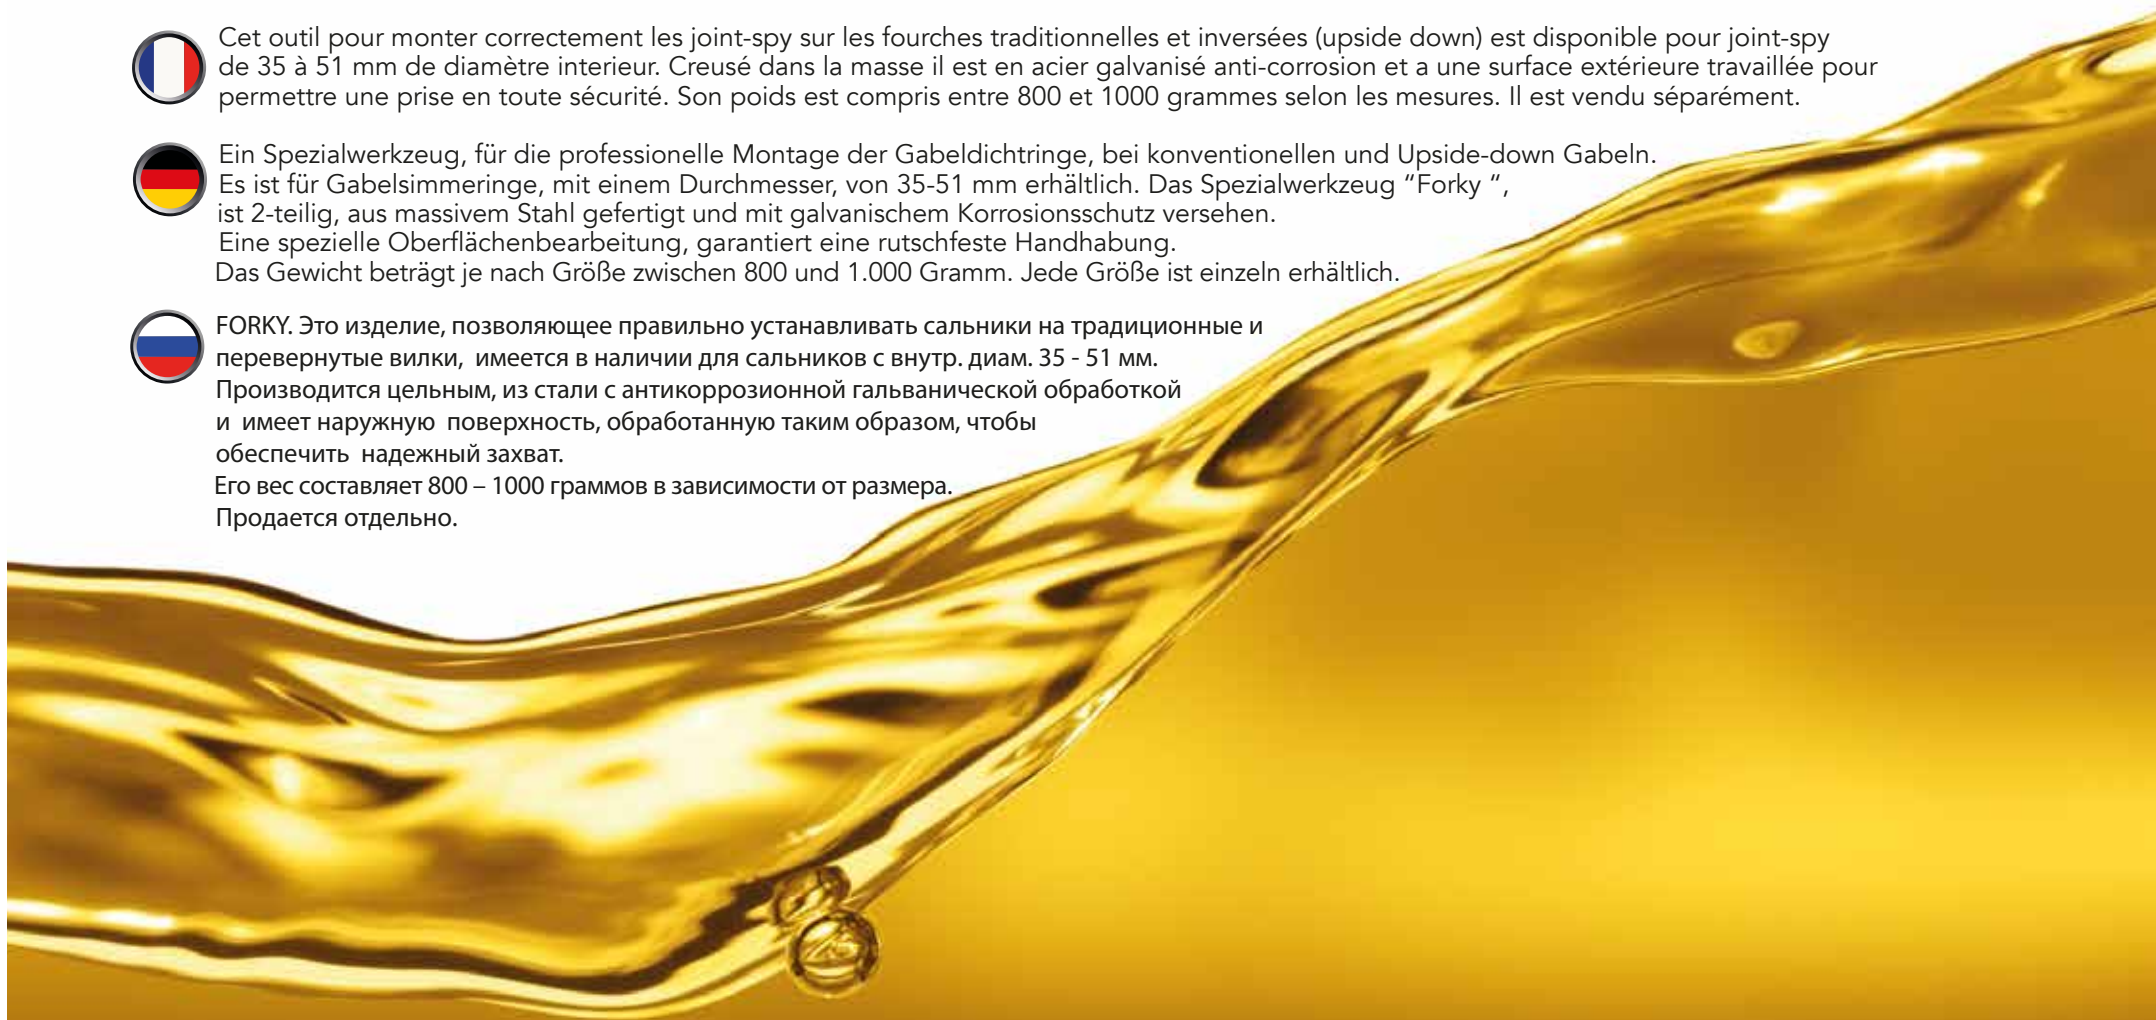

Cet outil pour monter correctement les joint-spy sur les fourches traditionnelles et inversées (upside down) est disponible pour joint-spy de 35 à 51 mm de diamètre intérieur. Creusé dans la masse il est en acier galvanisé anti-corrosion et a une surface extérieure travaillée pour permettre une prise en toute sécurité. Son poids est compris entre 800 et 1000 grammes selon les mesures. Il est vendu séparément.

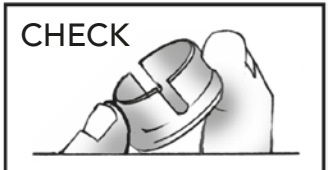

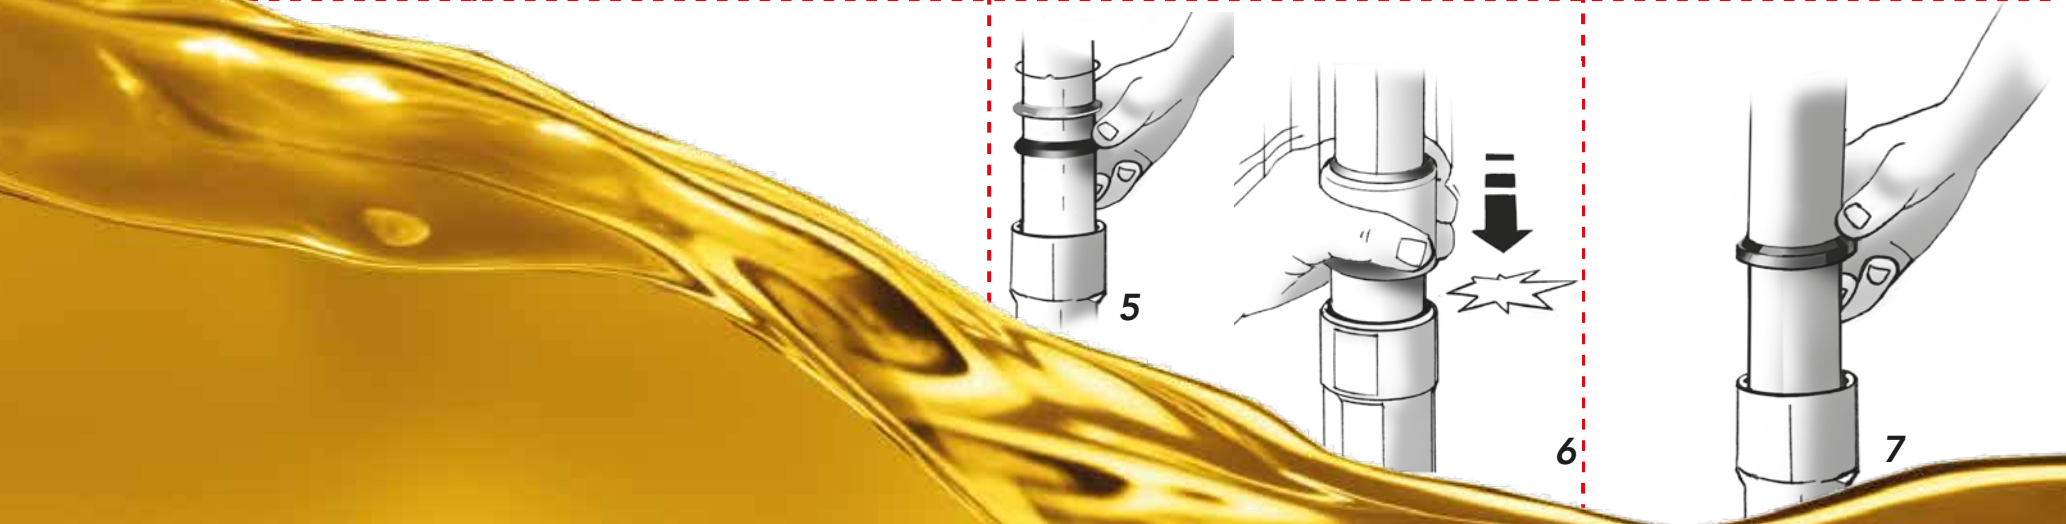

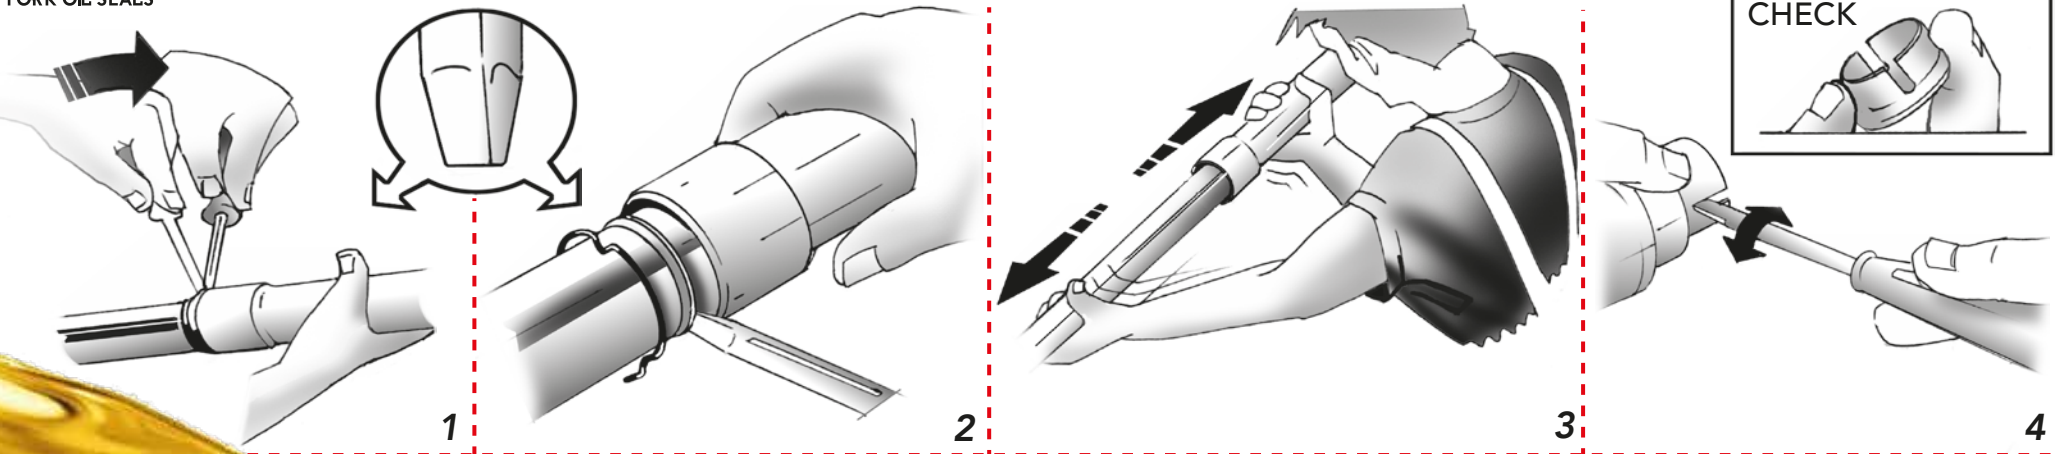

Ein Spezialwerkzeug, für die professionelle Montage der Gabeldichtringe, bei konventionellen und Upside-down Gabeln. Es ist für Gabelsimmeringe, mit einem Durchmesser, von 35-51 mm erhältlich. Das Spezialwerkzeug "Forky", ist 2-teilig, aus massivem Stahl gefertigt und mit galvanischem Korrosionsschutz versehen. Eine spezielle Oberflächenbearbeitung, garantiert eine rutschfeste Handhabung. Das Gewicht beträgt je nach Größe zwischen 800 und 1.000 Gramm. Jede Größe ist einzeln erhältlich.

FORKY. Это изделие, позволяющее правильно устанавливать сальники на традиционные и перевернутые вилки, имеется в наличии для сальников с внутр. диам. 35 - 51 мм. Производится цельным, из стали с антикоррозионной гальванической обработкой и имеет наружную поверхность, обработанную таким образом, чтобы обеспечить надежный захват. Его вес составляет 800 – 1000 граммов в зависимости от размера. Продается отдельно.
