BRAKE PAD & CLUTCH APPLICATION GUIDE

[www.dp-brakes.com](http://www.dp-brakes.com)

Harley-Davidson is a registered trademark of Harley-Davidson Motorcycles, Milwaukee, USA.

When it comes to the technology of peak performance braking, sintered metal is state-of-the-art. With the pioneering of its development by Dunlop Aviation, an industry was born. From it grew today's leader in sintered braking technology for motorcycles and ATVs - DP Brakes.

DP Brakes OEM replacement spec sintered metal brake pads are designed specifically for Harley-Davidson motorcycles. They are made of a complex mix of metallic powders (to absorb heat), refractory material (to provide friction), friction modifiers (to alter feel), graphites (to minimise rotor wear and eliminate noise), mixed together, pressed to form the shape (using a hydraulic press accurate to 0.002in), then sintered at high temperature and pressure in a vacuum furnace.

This state-of-the-art manufacturing process gives friction material properties that are unachievable using lesser sintering processes.

# THE ORIGINAL SINTERED BRAKES

*Premium sintered material specifically for Harley-Davidsons*

*More durable than stock pads*

*High tech ceramic heat shield where applicable*

Performance Machine calipers come with DP Brake pads as standard.

HHI calipers come with DP Brake pads as standard.

*"In addition to a full line of pads for all year Harleys, DP recently formulated pads for the new four-piston H-D caliper... a significant improvement in performance and durability over the stock pads."*
